Office Action Summary	Application No. 10/032,211	Applicant(s) GORDON, LUCAS S.	
	Examiner Leslie R. Deak	Art Unit 3762	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 December 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-73 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-73 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-54, drawn to a method for filtering fluid from a patient's blood, classified in class 604, subclass 5.01.
 - II. Claims 55-65, drawn to a system for filtering fluid from a patient's blood with magnetic fields, classified in class 604, subclass 6.08.
 - III. Claims 66-73, drawn to a system for filtering components from a fluid, classified in class 210, subclass 651.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the filtration process can be practiced by hand with another substrate that is not magnetic.
3. Inventions in Groups I and II and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions diverge since the apparatus

Art Unit: 3762

of group III does not require patient fluid, nor does it have means for withdrawal and return of fluid from a patient.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

a. Group I

i. Species A: Claims 1-13, drawn to a method of administering fluid to a patient, withdrawing blood, filtering it, and returning it to the patient.

ii. Species B: Claims 14-41, drawn to a method of combining a fluid with another fluid, administering combined fluid to a patient, withdrawing blood, filtering it, and returning it to the patient.

iii. Species C: Claim 42 drawn to a method of combining a fluid with another fluid, targeting an area of the patient's body, administering fluid to a patient, withdrawing blood, filtering it, and returning it to the patient.

iv. Species D: Claims 43-52 drawn to a method of combining a fluid with another fluid, targeting an area of the patient's body; creating a magnetic field, administering fluid to a patient, withdrawing blood, filtering it, and returning it to the patient.

Art Unit: 3762

- v. Species E: Claim 53 drawn to a method of administering a fluid to a patient and filtering patient fluids, but does not recite returning the fluid to the patient.
 - vi. Species F: Claim 54 drawn to a method of administering a fluid to a patient, waiting, and filtering patient fluids, but does not recite returning the fluid to the patient.
- b. Group II
 - vii. Species G: Claim 55 drawn to a system for filtering a patient's fluid comprising a magnetic generator but no filter.
 - viii. Species H: Claim 56 drawn to a system for filtering a patient's fluid comprising a magnetic generator and a filter.
 - ix. Species I: Claims 57-59 drawn to a system for filtering a patient's fluid comprising a magnetic generator, filter, means for administration, and a medical agent.
 - x. Species J: Claim 60, drawn to a system for filtering a patient's fluid comprising a magnetic generator, filter, means for administration, and a pump.
 - xi. Species K: Claims 61-65, drawn to a system for filtering a patient's fluid comprising a magnetic generator, magnetic separator, but no filter.
- c. Group III
 - xii. Species L: Claims 66-73 drawn to a magnetic filter for immobilizing an agent in a fluid.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, *** generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

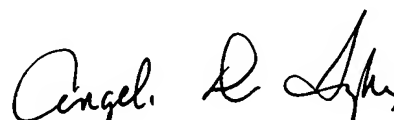

Art Unit: 3762

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie R. Deak whose telephone number is 703-305-0200. The examiner can normally be reached on M-F 7:30-5:00, every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on 703-308-5181. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
